

Dataset Information

Dataset Name: Traffic Sign Dataset for Classification

Source: Kaggle

Download Link: [Traffic Sign Dataset Classification](#)

Dataset Description:

This dataset contains labeled images of traffic signs, suitable for tasks such as image classification, computer vision, and machine learning model training. It includes various categories of traffic signs, making it useful for autonomous driving research, traffic sign recognition systems, and related applications.

How to Download:

1. Visit the Kaggle dataset link provided above.
2. Click on the "**Download**" button (requires a Kaggle account).
3. Extract the downloaded ZIP file to access the dataset.

Note:

- Ensure compliance with Kaggle's terms of use and licensing agreements.
- The dataset may require preprocessing (e.g., resizing, normalization) before use in machine learning models.
